TIPOLOGIE DI FILTRO ABITACOLO

La salute ed il benessere del guidatore del veicolo dipende dalla qualità dell'aria che si respira nell'abitacolo.

Compito fondamentale di un filtro abitacolo è quello di garantirne la massima qualità, proteggendo in totalità l'operatore da polveri, pollini, gas, cattivi odori, batteri e virus.

I più recenti dati statistici confermano che l'assenza di un filtro abitacolo ad altissime prestazioni aggrava il livello di inquinamento all'interno dell'abitacolo, inoltre, con il filtro intasato, i vetri si appannano più facilmente, disturbando la visibilità e mettendo in pericolo la sicurezza.

The health and well-being of the vehicle driver depend on the quality of the air we breath in the passenger compartment. The basic task of a cabin filter is to ensure maximum air quality, protecting the driver from dust, pollen, gases, bad odours, bacteria and viruses.

The latest statistics confirm that the absence of a high-performance cabin filter increases the level of pollution in the passenger compartment and, with a clogged filter, windows fog up more easily, impairing visibility and endangering safety.

Die Hauptaufgabe eines Innenraumfilters besteht darin, eine maximale Luftqualität zu gewährleisten und den Fahrer vor Staub, Pollen, Gasen, schlechten Gerüchen, Bakterien und Viren zu schützen.

Die neuesten Statistiken bestätigen, dass das Fehlen eines leistungsfähigen Innenraumfilters die Schadstoffbelastung im Fahrzeuginnenraum erhöht und bei einem verstopten Filter die Scheiben leichter beschlagen, was die Sicht beeinträchtigt und die Sicherheit gefährdet.

Les dernières statistiques confirment que l'absence d'un filtre d'habitacle performant augmente le niveau de pollution dans l'habitacle et, avec un filtre bouché, les vitres s'embuent plus facilement, ce qui nuit à la visibilité et compromet la sécurité.
